Communication	Work and Life Balance

Why StaffKit Training?

We offer online web based training, available 24 hours-a-day 7 days-a-week. All you need is an Internet connection and Internet Explorer 5.0 or newer. Learn from anywhere, anytime.

Simulations:

Gain the hands-on experience you're looking for through the use of our unique task-based simulations. It may seem like you're in the application, but you'll be safe within the bounds of the course. A Shockwave plug-in will enable you to run these optional simulations.

Skill Assessment

Save time by taking a pre-test before you take the course. The results of the test will let you know what parts of the course you need to take. A post-test is also available. You'll know how well you've mastered the material once you've completed this test.

Bookmarking

Our intelligent client technology recognizes where you are throughout a course and tracks your progress in a course. The next time you access the course, you will return to the same location within the course. You don't need to remember where you stopped or how to return to where you stopped.

Search

Search the entire courseware for a keyword or phrase, this is an excellent reference for quickly finding where to begin training.

CEU Credits

CEU credits are available for any of the courses offered by StaffKit. CEUs are a nationally recognized measure of completion of non-credit professional development learning activities by an approved provider. Students earn 1 CEU for every 10 hours of successfully completed course work. Students currently pay a \$20 CEU application fee for each course submitted for CEU credit.

Certificates

Answer the questions throughout the course, score 70% or better and you will be able to print your own "Certification of Completion".

Get Certified

We offer courses to help individuals prepare for the following certifications: A+, CISSP, CCNA, CCDA, CIW, CNE, Linux LPIC, MCDBA, MCSA, MCSD, MCSE, MCP, MOUS, Network+, Oracle, PMP, Sun Java, and more.
